Anger is an emotion that tends to be easy to see. However, anger is often just the tip of the iceberg. Other emotions may be hidden beneath the surface.

In some families, anger is seen as more acceptable than other emotions. A person might express anger in order to mask emotions that cause them to feel vulnerable, such as hurt or shame.

Anger triggers are people, places, situations, and things that set off anger. Your triggers can provide clues about the emotions behind your anger.

Anger may be fueled by different emotions at different times, or by a combination of emotions. Sometimes, however, anger is just anger.
